

Tree Pruning Workshop

**Urban Forestry Workshops
2017**

**Tuesday,
October 24**

**Brown County UW-Extension
(Neville Public Museum)
210 Museum Place
Green Bay, WI 54303**

An EEO/AA employer, University of Wisconsin-Extension provides equal opportunities in employment and programming, including Title IX and ADA requirements. Please make requests for reasonable accommodations to ensure equal access to educational programs as early as possible preceding the scheduled program, service or activity.

Instructors

Nathan Schuettepelz and Ryan Rodefer began their arboricultural careers simultaneously with Wachtel Tree Science, Inc. in the spring of 2010. Both earned Bachelor of Science Degrees in Urban Forestry from the University of Wisconsin-Stevens Point, and served as summer interns with Wachtel during this time.

Ryan's passion and skill for tree climbing and the advancements in technology quickly led him to a crew leader position within Wachtel's tree care operations. Ryan was a driving force in adopting rapidly evolving tree climbing systems and integrating those systems into Wachtel's safety oriented culture. He has ISA CTSP certification and now leads Wachtel Tree Science's Safety Program. Ryan has earned multiple awards from the Tree Care Industry Association.

Nathan's focus on the science within urban forestry management has him providing assistance with public tree inventories, forestry management plans, and implementation of Emerald Ash Borer management activities to communities across southern Wisconsin. Nathan now manages the Consulting Department within Wachtel and oversees the work that is critical to urban forestry management within the state.

Both Ryan and Nathan have been involved with the Wisconsin Arborist Association seasonal conferences, providing training and speaking engagements teaching attendees about ISA Arborist Certification and safe tree support systems installation. They have combined their respective professional backgrounds and exceptional communication skills to provide audiences with captivating and educational tree talks, and are excited to bring this experience to your community!

Program Information

This one-day workshop will show parks and tree professionals how to properly prune trees, from new tree training to mature tree maintenance, to create a strong enduring structure, maintain vigor, and achieve specific municipal objectives.

The workshop will include classroom instruction on pruning fundamentals and outdoor, hands-on demonstration of personal protective equipment along with pruning methods and techniques.

Who Should Attend

Community public works and parks employees, tree board members, managers, and others who have responsibility for or are involved in community tree pruning. Audience may also include groundskeepers, landscape contractors, tree/lawn care firms, nursery retailers, Master Gardeners, and volunteers. The attendees may or may not have some experience.
